

Introduction of Academic Clusters

In order to facilitate integration, and to ensure more efficient deployment of CPCE human resources, teaching staff in HKCC and SPEED are pooled together under Academic discipline “Clusters”. This provides a critical mass of expertise and better support for programmes.

The four Clusters established on 2 October 2008 namely are: Cluster of Business (CB), Cluster of Hotel and Tourism Management (CHTM), Cluster of Humanities, Communications and Social Science (CHCS), and Cluster of Science, Technology and Health Studies (CSTH).

The Clusters have been working diligently in broadening their respective programme portfolios. CB plans to add more programmes focused on accounting and finance, marketing and communications, and CHTM has developed programmes in event and hospitality management and has successfully reached agreement with HATA, Ningbo Polytechnic and Nanyuan Group to open doors for more industry cooperations in Hong Kong and Mainland China. CHCS intends to offer new programmes in professional English and psychology; while CSTH is exploring programmes related to nursing, food science and environmental science.
