

Over 80% of HKCC Associate Degree Graduates Articulate into Bachelor's Degree Studies

Of the 2,055 Hong Kong Community College (HKCC) Associate Degree students who graduated in 2009, 1,845 responded to a graduate survey conducted by HKCC last October, which represents a response rate of 90%. The findings show that 1,530 respondents are currently studying bachelor's degree programmes, which represents an articulation rate of 82.9%. Among those 1,530 respondents, 35% are enrolled in government-funded programmes of local universities, with most of the other graduates articulating to self-financed degrees offered by local universities.

Among the ones pursuing further studies, nearly 41% have taken up degree programmes offered by PolyU. Besides, 19% are studying either degree programmes offered by the School of Professional Education and Executive Development (SPEED) or overseas university degree programmes offered through SPEED. Dr. Simon Leung, Director of HKCC, remarked, "We are gratified to see that nearly 60% of our graduates are pursuing degree

programmes offered by PolyU and PolyU-affiliated SPEED. The phenomenon is living proof of our students' strong attachment to the PolyU family, and of our efforts in providing a seamless study path for our students to acquire higher qualifications."

Besides the 82.9% graduates who finished their two-year studies at HKCC before articulating into university, more than 100 Year 1 HKCC students have also made their way into university studies. After finishing only their first year of studies, these students – due to their outstanding performance in study or other areas – have been admitted into bachelor's degree programmes.

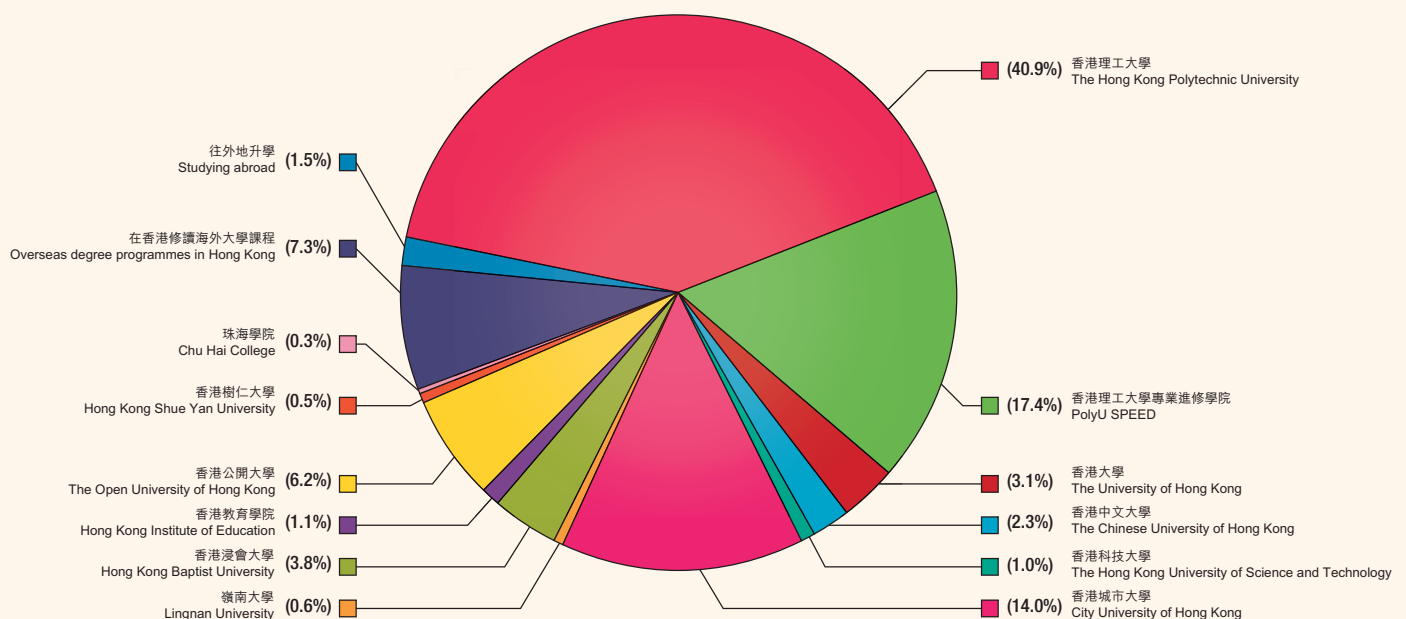

逾八成香港專上學院副學士畢業生升讀學位課程

在2009年，香港專上學院(HKCC)共有2,055名副學士畢業生。去年十月的HKCC畢業生調查成功訪問了1,845名，回覆率達90%。結果顯示，共有1,530名升讀學士學位課程，升學率高達82.9%，其中有35%入讀本地大學的政府資助學位課程，其餘大部份升讀本地大學開辦的自資學位課程。

在繼續升學的同學當中，近41%現於理大本部各學系修讀學士學位課程，約19%則修讀與理大轄下專業進修學院及其在本港開辦的海外學士學位課程。香港專上學院院長梁德榮博士表示：「我很高興看見近六成繼續升學的畢業生升讀理大或理大轄下專業進修學院的學士學位課程。這不但顯示了同學對理大的深厚情感，更肯定了我們為同學提供的『無縫銜接式』進修途徑以考取更高學歷的成效。」

除了上述82.9%修畢兩年副學士課程後銜接升讀大學的畢業生外，也有超過100名「另類拔尖生」由於成績或其他方面表現出眾，在HKCC修畢副學士課程第一年後，便獲大學提早取錄。
