

## New Web Technologies, New Learning Experience

Internet technologies have permeated our everyday lives. Through using social networking tools such as Facebook and Second Life, we can share information, knowledge and activities with others more conveniently. Besides, with the advancement of various web and mobile technologies, more tools and applications are now available for educational purpose.

To enhance the learning experience of its students and promote its online courses to more learners, HKCyberU has adopted the latest web technologies to bring information and knowledge to your fingertips.
